

MULTI-FAMILY TRADE INCENTIVES NOW AVAILABLE

Put money in your customers' pockets, as well as your own, with the Multi-Family Building Efficiency incentive program. Each time you install rebated high-efficiency measures for your multifamily building customers, you earn cash incentives.

Incentives are based on existing HVAC and water heater trade incentives through each utility.

WHAT YOU NEED TO DO

1. Familiarize yourself with the program and eligibility by visiting multifamilyenergysolutions.com.
2. Recommend that eligible multifamily building customers take advantage of the comprehensive services offered by CenterPoint Energy and Xcel Energy.
3. Work with our program representatives, Frontier Energy, to have them submit the Multi Family Building Efficiency rebate to the utility.

You will need to provide them your Trade Partner/ Ally identification number. It is important you DO NOT submit rebates to your utility to avoid issues with processing your customer's rebate payment.

Multi-Family Building Efficiency Program

MULTI-FAMILY BUILDING EFFICIENCY PROGRAM BASICS

Help your multi-family building owners and managers find and address energy saving opportunities. CenterPoint Energy and Xcel Energy have teamed up to offer a **FREE** program that can help your customers take a comprehensive, strategic approach to improving energy efficiency throughout their 5+ unit buildings.

Free whole building services include:

- On-site energy efficiency audit
- Installation of energy saving items, such as LEDs, showerheads and more
- Rebates and bonus incentives for making energy efficiency upgrades throughout their building.
- Energy usage and recommendation report
- Consulting support

Multi-Family Building Efficiency customers that earn incentives may not be eligible for additional bonus rebates offered by the building's utility.
